01 | EXECUTIVE SUMMARY

Spectex AI is pleased to present this proposal for a bespoke **Business Demand Forecasting & Inventory Intelligence Dashboard** — a complete solution that transforms your sales, marketing, and supply-chain data into clear, actionable forecasts and inventory decisions.

The platform unifies your historical sales, product performance, and stock-level data into one intelligent view. Leadership and operations teams gain short-, medium-, and long-range demand outlooks, forecast accuracy tracking, inventory health monitoring, supply pipeline visibility, seasonal peak planning, and product-level action plans — all through a single, professional dashboard.

Delivery is structured over **six weeks**, with investment from **USD \$1,000 to \$10,000** depending on your data volume, product range, and integration needs. This engagement delivers enterprise-grade forecasting intelligence at a scale suited to your business.

\$1K – \$10K	6 Weeks	AI-Powered	Any Industry
Flexible Pricing	End-to-End Delivery	Smart Forecasting	Sales + Inventory Intel

02 | ABOUT SPRECTEX AI

Spectex AI is a globally operating Artificial Intelligence solutions firm, recognized as a pioneer in delivering enterprise-grade AI products across retail, wholesale, manufacturing, logistics, healthcare, and professional services.

Our team combines deep research with practical delivery to build systems that are reliable, scalable, and easy for your people to use. Clients across multiple continents trust us for forecasting, analytics, and intelligent automation — from growing brands to established enterprises.

OUR MISSION	OUR VISION
To democratize artificial intelligence by delivering powerful, accessible, and ethical AI solutions that transform industries and empower organizations globally.	To be the world's most trusted AI solutions partner — building tomorrow's intelligence infrastructure through relentless innovation and client-centric delivery.

CORE COMPETENCIES

Competency Area	Our Approach	Industry Application
Demand Forecasting	Advanced predictive modelling & trend analysis	Retail, Wholesale, Distribution
Time-Series Intelligence	Pattern recognition across historical data	Inventory & Supply Chain
Data Integration	Automated import, validation & normalization	Multi-source business data
Business Intelligence	Interactive visual analytics & KPI reporting	Executive & operations dashboards
Secure Deployment	Cloud-hosted, scalable, access-controlled	Enterprise-grade availability

03 | OUR LEADERSHIP TEAM

Sprectex AI is led by a team that blends artificial-intelligence expertise, business leadership, and strategic governance — committed to delivering intelligent solutions that create real, measurable value for our clients.

Syeda Shamaim Fatima
Chief Executive Officer

Muhammad Danish Khan
Chief Artificial Intelligence Officer

Muhammad Osama
Board Member & Director

LEADERSHIP & GOVERNANCE

Leader	Role	Area of Responsibility
Syeda Shamaim Fatima	Chief Executive Officer	Overall vision, client partnerships, and company strategy
Muhammad Danish Khan	Chief Artificial Intelligence Officer	AI research, forecasting models, and technical delivery
Muhammad Osama	Board Member & Director	Corporate governance, oversight, and strategic direction

04 | PROJECT OVERVIEW & SCOPE

Your business manages a growing product portfolio across one or more sales channels and needs reliable demand forecasting to optimize stock levels, reduce waste, and plan replenishment ahead of peak seasons. Today, many teams still rely on spreadsheets and manual review — a process that is slow, inconsistent, and difficult to scale.

This solution directly addresses three core challenges:

- **Manual Forecasting Bottleneck:** Sales and performance data reviewed manually with no unified short-, medium-, or long-range demand outlook.
- **Limited Inventory Visibility:** No single view of warehouse, in-transit, and available stock aligned with forecasted demand.
- **Missed Seasonal Opportunities:** Peak trading periods and promotional events not factored into reorder planning and safety stock.

PROJECT SCOPE BOUNDARIES

IN SCOPE	OUT OF SCOPE
Integration of client sales, marketing, and inventory data	Real-time streaming integrations (available as add-on)
Demand forecasting engine (short, medium & long-range horizons)	Hardware procurement or warehouse system replacement
Per-product and portfolio-level forecast dashboards	Mobile application development
Inventory health, supply pipeline, and reorder alerts	Third-party system integrations beyond agreed scope
Web-based analytics dashboard (responsive, any device)	Long-term managed service (optional add-on)
Seasonal and promotional event calendar	—
PDF and spreadsheet export of forecast reports	—
Admin panel for data upload and configuration	—

05 | SOLUTION ARCHITECTURE & METHODOLOGY

The solution is built as a modular, scalable forecasting platform. Each layer works independently yet connects seamlessly. The design follows three clear stages: **Data Collection**, **Forecasting & Intelligence Engine**, and **Dashboard & Reporting**.

LAYER	COMPONENT	METHOD	FUNCTION
Data Collection	Data Import Service	Automated validation	Accepts sales, inventory, and performance files or feeds; cleans and standardizes data
Data Collection	Central Data Store	Secure structured storage	Maintains historical sales, product rankings, and stock levels per item
Intelligence Engine	Demand Forecaster	AI-driven prediction	Generates short-, medium-, and long-range unit forecasts per product and category
Intelligence Engine	Performance Signal Processor	Signal blending	Combines sales trends with marketing and visibility signals for sharper forecasts
Intelligence Engine	Seasonal Adjuster	Event-based modelling	Applies uplift factors for holidays, promotions, and peak trading periods
Intelligence Engine	Inventory Optimizer	Safety stock logic	Calculates reorder points, pipeline targets, and days of stock remaining
Intelligence Engine	Accuracy Tracker	Continuous validation	Measures forecast vs actual performance and confidence per product
Dashboard & Reporting	Secure Access Layer	Controlled data delivery	Delivers forecast data, inventory KPIs, and alerts to the dashboard
Dashboard & Reporting	Interactive Dashboard	Visual analytics	Insights, inventory, and action-plan views with live data refresh
Dashboard & Reporting	Report Generator	Automated output	Produces downloadable forecast and reorder reports on demand

06 | AI FORECASTING ENGINE & DEMAND MODEL

DEMAND FORECASTING & PERFORMANCE SIGNALS

Our proprietary forecasting engine blends historical sales with marketing and visibility signals to produce accurate demand predictions. The model smooths weekly performance, applies intelligent uplift factors, and adjusts for seasonal peaks — delivering reliable short-, medium-, and long-range forecasts at both product and portfolio level.

- **Forecast Horizons:** Flexible short-, medium-, and long-range unit outlook per product and category
- **Sales Integration:** Weekly and monthly sales data — units sold, impressions, engagement, and conversion
- **Visibility Boost:** Ranking and marketing signals applied as intelligent demand uplift factors
- **Seasonal Adjustment:** Automatic uplift for holidays, promotions, and peak trading periods
- **Growth Planning Factor:** Configurable multiplier for strategic demand and expansion planning
- **Confidence Scoring:** Forecast reliability rated on a clear scale with ongoing accuracy tracking

INVENTORY & REORDER INTELLIGENCE

The inventory module brings together stock across your entire supply chain — warehouse, distribution centres, third-party logistics, and goods in transit — and compares available inventory against forecasted demand to produce clear reorder recommendations, fully aware of your lead times and replenishment cycles.

Capability	Methodology	Output
Stock Aggregation	Multi-location inventory sync	Total supply chain stock per product
Days of Stock	Available units vs daily demand	Coverage days remaining at current pace
Reorder Forecast	Demand plus safety buffer	Transit targets, warehouse targets, reorder dates
Pipeline Tracking	In-transit and warehouse breakdown	Supply pipeline status and health indicators
Risk Alerts	Stock-out probability scoring	High, medium, and low risk flags per product
Event Calendar	Seasonal date engine	Countdown to upcoming peak trading and promotional events

07 | DASHBOARD & INVENTORY INTELLIGENCE MODULES

The forecasting dashboard is designed for operations, inventory, and leadership teams. Clean, responsive, and easy to navigate, it brings demand forecasts, inventory health, supply pipeline status, and seasonal planning into one professional workspace — giving everyone the same trusted view of what is happening and what to do next.

Executive Insights

- Demand forecast summary cards with pace indicators across all horizons
- Current-period actual sales vs forecast comparison
- Forecast accuracy score with per-product tracking
- Inventory health status and supply pipeline overview
- Model confidence indicator based on data signal strength
- Executive insight panel with upcoming seasonal events
- Weekly demand chart — forecast vs actual performance
- Demand mix breakdown by product category

Inventory Intelligence

- Top-performing product selector with quick navigation
- Seasonal and promotional event calendar with countdowns
- Period selector and per-product data filters
- Total supply chain stock breakdown by location
- Current stock view with pipeline and available totals
- Sales performance KPIs — units, reach, engagement, conversion
- Reorder forecast with lead-time and model selection
- Persistent data storage and refresh controls

90-Day Action Plan

- Per-product stock sufficiency analysis and days remaining
- Estimated daily sales with uplift and seasonal factor breakdown
- Configurable growth factor for strategic planning scenarios
- Stock sufficiency check against long-range target units
- Pipeline targets for transit and warehouse replenishment
- Transparent methodology panel — how every number is calculated
- Prior-period baseline, safety stock, and next peak event display
- Model fit accuracy and engine version tracking

Risk & Opportunity Alerts

- Stock-out risk flags per product with severity levels

- Overstock warnings for slow-moving inventory
- Peak season preparation reminders
- Forecast deviation alerts when actuals diverge from prediction
- Reorder deadline notifications based on lead time

Reporting & Export

- Auto-generated forecast summary reports
- Downloadable reports in standard business formats
- Shareable dashboard access with role-based permissions
- Scheduled weekly and monthly forecast delivery by email

08 | INVENTORY ANALYTICS & SEASONAL PLANNING

The Seasonal Planning & Inventory Analytics module shows how holidays, promotions, and peak trading periods affect your forecasts and reorder decisions. Whether you sell online, in-store, or through distribution partners, this module helps your team plan ahead with confidence.

Dimension	Data Source	Output	Business Value
Weekly Sales	Client sales & performance reports	Units sold, reach, and engagement per product	Baseline demand estimation
Market Visibility	Marketing & ranking performance data	Visibility uplift multiplier	Demand adjustment from market presence
Warehouse Stock	Inventory location reports	Available units and days of stock remaining	Stock-out prevention
In-Transit & 3PL	Shipment & logistics data	Pipeline units and reorder targets	Lead-time aware replenishment
Seasonal Events	Promotional & holiday calendar	Configurable uplift per event and horizon	Peak season inventory planning
Safety Stock	Buffer calculation engine	Safety stock units per product	Protection against demand volatility
Forecast Accuracy	Actual vs predicted comparison	Accuracy score per product	Ongoing model refinement and trust

REPORTING & EXPORT CAPABILITIES

- Auto-generated forecast reports with demand charts and inventory summaries
- Export of sales, forecast, and stock data for custom analysis
- Shareable dashboard access with role-based permissions
- Scheduled report delivery via email — weekly and monthly summaries
- Configurable report builder — select forecast horizon and product range

09 | PROJECT TIMELINE — 6-WEEK DELIVERY PLAN

The project is structured across **six focused delivery sprints**, each lasting one week. This agile delivery approach ensures continuous progress visibility, early risk identification, and iterative feedback integration. The client receives a working prototype at the end of Week 3.

Sprint	Week	Focus Area	Deliverables	Milestone
Sprint 1	Week 1	Discovery & Planning	Data audit, solution design, data mapping, project kick-off	Kick-off Complete
Sprint 2	Week 2	Data Pipeline & Forecasting Engine	Data import, forecasting model, performance signal processing	Engine Running
Sprint 3	Week 3	Inventory Logic & Seasonal Calendar	Stock aggregation, reorder calculator, seasonal uplift, safety stock	Working Prototype
Sprint 4	Week 4	Dashboard Development	Insights and inventory views, charts, KPI cards, product navigation	Dashboard Live
Sprint 5	Week 5	Action Plan & Alerts	Per-product action plans, risk alerts, reporting and export module	Full Feature Set
Sprint 6	Week 6	Testing, Launch & Handover	End-to-end QA, accuracy validation, deployment, documentation, training	Final Delivery

10 | PRICING & INVESTMENT BREAKDOWN

Investment for this Forecasting Dashboard ranges from **USD \$1,000 to \$10,000**, determined by your product range, data history, number of data sources, and integration requirements. The fee is all-inclusive — covering design, development, forecasting engine setup, deployment, testing, documentation, and project management. No hidden costs for agreed scope.

Pricing is tailored to your business: we confirm the exact tier after a brief discovery conversation to understand your data and goals.

Tier	Scope & Data Profile	Includes	Duration	Investment
Starter	1–3 products · Basic data upload	Insights dashboard, medium-range forecast, manual data import	4 Weeks	USD \$1,000
Growth	4–10 products · Sales + inventory data	Insights + Inventory modules, multi-horizon forecast, event calendar	5 Weeks	USD \$3,500
Professional	11–25 products · Multi-source data	Full dashboard suite, 90-day action plan, alerts, report export	6 Weeks	USD \$6,500
Enterprise	25+ products · Advanced integrations	Everything in Professional + live data feeds, custom tuning, priority support	6–8 Weeks	USD \$10,000
	YOUR QUOTED INVESTMENT	Final price confirmed after discovery — within \$1,000–\$10,000 range	4–8 Weeks	From \$1,000

Payment Schedule: 50% advance upon contract signing to commence work immediately. Remaining 50% upon final delivery and client acceptance sign-off. Advance amount scales with your quoted tier (e.g. Starter: \$500 advance / \$500 on delivery; Enterprise: \$5,000 / \$5,000).

Accepted Payment Methods: Bank wire transfer (international), Wise, PayPal (Business), or USDT/USDC cryptocurrency. Invoice provided upon engagement confirmation.

11 | DELIVERABLES & ACCEPTANCE CRITERIA

Deliverable	Format	Acceptance Criteria
Forecasting Intelligence Dashboard	Web Application	Insights, inventory, and action-plan modules functional and responsive on all devices
Demand Forecasting Engine	Integrated AI Service	Short-, medium-, and long-range forecasts generated with high accuracy on client data
Performance Signal Processor	Integrated AI Service	Sales trends blended with visibility signals; confidence score displayed clearly
Inventory & Reorder Module	Dashboard Module	Multi-location stock aggregated; reorder targets calculated per product
Seasonal Calendar Engine	Dashboard Module	Holiday and promotional uplift factors applied correctly to all forecasts
Risk & Opportunity Alerts	Dashboard Module	Stock-out and overstock alerts generated with clear severity classification
Automated Report Generator	Downloadable Reports	Clean, formatted forecast and inventory reports exportable per product or portfolio
Admin Data Upload Portal	Web Interface	Sales and inventory file upload with processing queue and status tracking
Source Code Repository	Private Repository	Complete, documented codebase with setup and configuration guide
Solution Documentation	Document Package	System overview, deployment guide, and end-user manual
Deployment & Hosting Setup	Live Environment	Secure, accessible URL with monitoring and handover completed

12 | WHY SPRECTEX AI — OUR DIFFERENTIATORS

Proven Forecasting Expertise	Our team brings deep experience in demand forecasting and business analytics. We have delivered forecasting solutions for retail, wholesale, manufacturing, and distribution clients across 15+ countries.
Rapid Delivery Without Compromise	Our sprint-based approach delivers a working prototype by Week 3 and the full dashboard in 4–8 weeks — without sacrificing forecast quality or usability.
Industry-Agnostic Intelligence	Unlike generic software firms, SprecTex AI builds forecasting systems that adapt to your industry, product range, sales channels, and seasonal patterns.
Enterprise Security Standards	All client sales and inventory data is handled under strict confidentiality, encrypted storage, and access-controlled environments. NDAs are signed as standard practice.
Ultra-Professional Dashboards	Our design team creates dashboards that are clear, polished, and executive-ready — with interactive charts, KPI cards, and insight panels your team will actually use.
Transparent Forecast Methodology	Every forecast shows how it was calculated — visibility factors, seasonal adjustments, growth planning, safety stock, and accuracy scores — so your team trusts every number.
Post-Delivery Support	Every engagement includes 30 days of complimentary post-launch support for bug fixes, refinements, and technical guidance.

13 | TERMS, CONDITIONS & NEXT STEPS

Intellectual Property

Upon final payment, the client receives full ownership of all custom-developed code, trained forecasting models, and deliverables specific to this engagement. SprecTex AI retains rights to its core proprietary frameworks and pre-trained base models.

Confidentiality

SprecTex AI treats all client sales data, inventory records, and business information with strict confidentiality. An NDA is signed prior to commencement. All team members are bound by confidentiality agreements. No client data is shared, sold, or used for purposes outside this engagement.

Change Management

Any changes to scope after Sprint 2 are subject to a formal change request process. Minor changes (under 4 hours effort) are accommodated within the fixed price. Larger scope additions are quoted separately and require mutual written agreement.

Warranty & Bug Fixing

All delivered features are covered by a 30-day warranty period post-launch. Critical bugs are resolved within 48 hours. Non-critical issues are addressed within 5 business days at no additional charge.

Force Majeure

Neither party shall be liable for delays caused by events beyond reasonable control, including natural disasters, network outages, or government-mandated restrictions. Project timelines will be adjusted mutually in such events.

Governing Terms

This proposal constitutes a commercial offer. A formal contract/Statement of Work will be issued upon acceptance. Disputes are subject to good-faith mediation before any formal legal proceedings.

NEXT STEPS TO PROCEED

- **Step 1:** Review this proposal and confirm agreement on scope and commercial terms
- **Step 2:** Sign the Statement of Work (SOW) and Non-Disclosure Agreement (NDA)
- **Step 3:** Submit the 50% advance payment to initiate the project (amount per quoted tier)
- **Step 4:** Provide sample sales data, inventory records, and product list for discovery
- **Step 5:** Project kick-off meeting scheduled within 48 hours of payment confirmation
- **Step 6:** Weekly check-in meetings every Friday throughout the engagement

READY TO BEGIN?

Contact us today to confirm your acceptance and initiate this transformative Forecasting Dashboard project.
