

SPRECTEX AI

Pioneer in Artificial Intelligence Solutions

PROJECT PROPOSAL

Chicken Farm AI Video Analytics & Counting Intelligence Platform

Prepared For: **Valued Business Client**

Prepared By: **Spectex AI — Global AI Solutions Division**

June 2026 · 6 Weeks Delivery · Ready-to-Go Poultry Farm AI Product

TURN EVERY FARM CAMERA INTO POULTRY INTELLIGENCE

Chicken Counting & Farm Monitoring

Broilers · Layers · Breeders · Hatcheries · Poultry Houses · Global Farm Deployment

01 | EXECUTIVE SUMMARY

Spectex AI is pleased to present this proposal for a **Ready-to-Go Chicken Farm AI Video Analytics & Counting Intelligence Platform** — a complete poultry-focused solution that transforms farm cameras, poultry house footage, hatchery video, mobile video, and existing CCTV into structured flock intelligence.

The platform is built for poultry farms across the world — broiler farms, layer farms, breeder farms, hatcheries, poultry houses, sheds, barns, farms with multiple houses, and large commercial operations. It detects and counts chickens, monitors flock density, tracks movement, identifies abnormal behavior, supports mortality and missing-bird checks, monitors feed and water zone activity, and provides farm-level alerts through one professional dashboard.

Built for global poultry businesses that need reliable counting and secure farm monitoring, the system is delivered as a ready-to-go product within **six weeks**. It can be deployed on farm premises or private cloud, ensuring farm video data remains protected, access-controlled, and not leaked outside the authorized environment.

Chicken Counting	6 Weeks	AI-Powered	No Leakage
Farm-Level Accuracy	Ready-to-Go Delivery	Flock Intelligence	Secure Farm Deployment

02 | ABOUT SPRECTEX AI

Spectex AI is a globally operating Artificial Intelligence solutions firm, recognized as a pioneer in delivering enterprise-grade AI products across video analytics, agriculture intelligence, livestock monitoring, farm automation, safety systems, and data-driven decision platforms.

Our team combines deep research with practical delivery to build systems that are reliable, scalable, and easy for your people to use. Organizations across multiple continents trust us for AI video analytics, poultry intelligence, farm monitoring, and operational dashboards — from small farms to large commercial poultry enterprises.

OUR MISSION	OUR VISION
To democratize artificial intelligence by delivering powerful, accessible, and ethical AI solutions that transform industries and empower organizations globally.	To be the world's most trusted AI solutions partner — building tomorrow's intelligence infrastructure through relentless innovation and client-centric delivery.

CORE COMPETENCIES

Competency Area	Our Approach	Application
Chicken Counting	Automated chicken, flock & density counting	Broiler, layer, breeder farms
Flock Activity Analytics	Movement, crowding & behavior monitoring	Poultry houses and sheds
Farm Health Signals	Mortality, inactivity & abnormal behavior alerts	Farm managers and veterinarians
Farm Security Intelligence	Intrusion, access and perimeter monitoring	Farmhouses and poultry sites
Secure Deployment	On-premises or private-cloud, access-controlled	No leakage, global farm availability

03 | OUR LEADERSHIP TEAM

Sprectex AI is led by a team that blends artificial-intelligence expertise, business leadership, and strategic governance — committed to delivering intelligent solutions that create real, measurable value for our clients.

Syeda Shamaim Fatima
Chief Executive Officer

Muhammad Danish Khan
Chief Artificial Intelligence Officer

Muhammad Osama
Board Member & Director

LEADERSHIP & GOVERNANCE

Leader	Role	Area of Responsibility
Syeda Shamaim Fatima	Chief Executive Officer	Overall vision, client partnerships, and company strategy
Muhammad Danish Khan	Chief Artificial Intelligence Officer	AI research, poultry video analytics engines, and secure technical delivery
Muhammad Osama	Board Member & Director	Corporate governance, oversight, and strategic direction

04 | PROJECT OVERVIEW & SCOPE

Poultry farms manage thousands to millions of birds across houses, sheds, pens, cages, and batches. Manual chicken counting and visual flock inspection are slow, inconsistent, labor-intensive, and difficult to scale across multiple farms and countries.

Spectex AI delivers a ready-to-go Chicken Farm AI Video Analytics platform that connects with existing cameras or uploaded farm footage, detects chickens, estimates flock count, monitors density and movement, supports mortality and missing-bird checks, tracks feeding/water activity, generates farm alerts, and protects farm video data without leakage outside the approved environment.

This solution directly addresses three core challenges:

- **Manual Chicken Counting Bottleneck:** Counting chickens manually is slow and unreliable — AI estimates flock count from video and tracks changes over time.
- **Flock Health & Activity Blind Spots:** Farm teams need visibility into inactivity, crowding, abnormal movement, dead-bird signals, and feed/water zone activity.
- **Farm Data Privacy Risk:** Farm footage and production data are sensitive — the system supports on-premises/private deployment, role-based access, and controlled storage so nothing leaks outside your farm environment.

PROJECT SCOPE BOUNDARIES

IN SCOPE	OUT OF SCOPE
AI video analytics pipeline for poultry farm cameras and uploaded footage	Camera hardware procurement unless separately agreed
Chicken detection, flock counting and density estimation	Veterinary diagnosis or medical treatment services
Bird movement, inactivity, crowding and abnormal behavior alerts	Physical farm labor or manual catching services
Mortality/missing-bird support and feed/water zone activity monitoring	Government regulatory certification or legal advisory
Poultry dashboards for houses, sheds, pens, cages, batches and farms	Manual annotation of large historic archives beyond agreed scope
On-premises/private cloud option with access control	—
Automated alerts, reports, audit trails and role management	—
Ready-to-go deployment and handover for global farm operations	—

05 | SOLUTION ARCHITECTURE & METHODOLOGY

The solution is built as a modular, scalable poultry intelligence platform. Each layer works independently yet connects seamlessly. The design follows three clear stages: **Farm Video Ingestion**, **AI Chicken Counting Engine**, and **Secure Farm Dashboard & Reporting**.

LAYER	COMPONENT	METHOD	FUNCTION
Farm Video Ingestion	Camera & Video Intake	Automated validation	Accepts poultry house cameras, CCTV/IP feeds, uploaded videos, mobile footage, and farm walkthrough footage
Farm Video Ingestion	Secure Farm Video Store	Controlled storage	Maintains farm video metadata, house/pen tags, alerts, clips, and analytics in client-controlled storage
AI Chicken Engine	Chicken Detection	AI visual recognition	Detects birds in poultry houses, cages, pens, feeders, drinker zones, and open farm areas
AI Chicken Engine	Counting Engine	Automated flock counting	Estimates chicken count by house, batch, pen, cage, camera zone, and selected time period
AI Chicken Engine	Flock Activity Engine	Behavior and movement analytics	Tracks movement, inactivity, crowding, clustering, feed/water zone activity, and abnormal behavior
AI Chicken Engine	Farm Health Signals	Alert recognition	Supports mortality/missing-bird checks, low movement alerts, density risks, and unusual pattern detection
AI Chicken Engine	Farm Security & Access	Configurable rules	Monitors house entry, perimeter activity, unauthorized access, doors, farm gates, and after-hours activity
Dashboard & Reporting	Secure Access Layer	Role-based delivery	Delivers analytics only to authorized owners, farm managers, supervisors, and veterinary/operations teams
Dashboard & Reporting	Poultry Farm Dashboard	Visual analytics	Counting, density, flock activity, mortality support, farm security, and batch views
Dashboard & Reporting	Report & Alert Engine	Automated output	Produces count reports, alerts, evidence clips, batch summaries, audit trails, and operational reports

06 | AI CHICKEN COUNTING ENGINE

POULTRY VIDEO INTELLIGENCE

The AI Chicken Counting Engine processes live or recorded poultry farm footage to detect chickens, estimate flock count, monitor density, track activity, identify abnormal patterns, and support mortality/missing-bird checks. It is designed for broiler farms, layer farms, breeder farms, hatcheries, poultry houses, cages, pens, sheds, barns, and commercial operations anywhere in the world.

- **Chicken Detection:** Detects birds across poultry houses, cages, pens, feeders, drinker lines, and open farm zones
- **Chicken Counting:** Estimates bird count by camera, zone, house, pen, cage, batch, or selected time period
- **Flock Density Analytics:** Monitors crowding, clustering, uneven distribution, and density changes
- **Activity Monitoring:** Tracks movement levels, inactivity, feed/water zone behavior, and unusual flock patterns
- **Mortality & Missing-Bird Support:** Flags low-movement areas, possible dead birds, and count differences for farm review
- **Global Farm Adaptability:** Configurable templates for broilers, layers, breeders, hatcheries, indoor houses, free-range zones, and large-scale farms

POULTRY FARM COVERAGE & ANALYTICS OUTPUT

The platform is designed for poultry owners, integrators, farm managers, supervisors, veterinarians, operations teams, and global poultry enterprises. Each farm receives relevant count estimates, flock activity signals, evidence clips, alerts, dashboards, and operational reports.

Capability	Methodology	Output
Broiler Farms	Flock count and density estimation	House-level count, growth-cycle tracking, crowding alerts
Layer Farms	Cage/pen and house activity monitoring	Bird count support, activity, feed/water area visibility
Breeder Farms	Movement and distribution tracking	Flock uniformity signals and house activity summary
Hatcheries	Chick movement and batch visibility	Batch counting support and chick-flow monitoring
Free-Range / Open Areas	Outdoor bird detection and zone monitoring	Area occupancy, movement, perimeter alerts
Multi-Farm Enterprises	Centralized farm dashboard	Cross-farm counts, alerts, reporting, and global visibility

07 | POULTRY FARM ANALYTICS MODULES

The Poultry Farm Intelligence Dashboard is the single control center for chicken counting, flock activity, density monitoring, farm security, mortality support, evidence clips, and reporting. It gives farm owners, managers, supervisors, veterinarians, and operations teams a polished workspace for turning farm video into decisions.

Chicken Counting Module

- Automated chicken detection from camera/video footage
- Flock count estimation by house, pen, cage, zone, and batch
- Before/after count comparison across time periods
- Count confidence indicator for farm review
- Role-based farm counting dashboard

Flock Density & Distribution Module

- Crowding and clustering detection
- Uneven distribution across sheds, pens, cages, and feeding areas
- Density risk indicators
- Heatmap-style zone summaries
- House-level and farm-level density trends

Feed, Water & Activity Monitoring

- Feed and drinker zone activity monitoring
- Movement level and inactivity tracking
- Low-activity and abnormal-behavior alerts
- Daily flock activity timeline
- Batch and growth-cycle activity comparison

Mortality, Missing-Bird & Health Signals

- Possible dead-bird and low-movement area flags
- Missing-bird or count difference support
- Abnormal crowding and isolation alerts
- Evidence clips for supervisor/veterinary review
- Daily health-signal summaries

Farm Security & Reporting

- Farmhouse, poultry house, gate and perimeter intrusion alerts
- After-hours movement and unauthorized access detection
- Downloadable evidence clips and reports

- Owner, admin, manager, veterinarian and supervisor views
- Farm-level analytics with no data leakage

08 | FARM SECURITY, HEALTH & REPORTING

Global Poultry Farms Covered

Broiler, layer, breeder, hatchery, indoor house, cage, pen, shed, barn, free-range and multi-site commercial poultry operations — all supported through configurable farm analytics templates.

Farm Footage Stays Protected

The system supports farm-premises or private-cloud deployment, role-based access, secure storage, audit trails, and restricted data flow so farm footage remains protected and does not leak outside authorized access.

Beyond counting, the system turns poultry footage into actionable farm intelligence — helping owners, managers, supervisors, and veterinarians understand flock condition, activity, count changes, and risks.

Dimension	Data Source	Output	Business Value
Chicken Count	House/cage/pen cameras	Estimated birds by zone, house, batch and time	Better flock inventory visibility
Density	Poultry house footage	Crowding, clustering and uneven distribution	Lower crowding and stress risk
Activity	Live or recorded video	Movement, inactivity, feed/water zone activity	Early abnormal behavior visibility
Health Signals	Farm video evidence	Possible dead-bird, missing-bird and low-movement flags	Faster farm review and response
Security	Farmhouse, gates and poultry house cameras	Intrusion, after-hours movement, unauthorized access	Protected farm operations
Reporting	Tagged clips and alerts	Daily counts, batch summaries, evidence clips	Clear farm communication

REPORTING & EXPORT CAPABILITIES

- Auto-generated chicken count, density, activity and farm security reports
- Automated evidence clips for mortality support, low activity and intrusion alerts
- Export of count estimates, flock activity, alerts and batch analytics
- Role-based farm dashboard access with audit trails
- Scheduled summaries for owners, farm managers, supervisors and veterinary teams

09 | PROJECT TIMELINE — 6-WEEK DELIVERY PLAN

As a ready-to-go poultry farm video analytics product, the system is configured, customized, and deployed for your farm operation across **six focused delivery sprints**, each lasting one week. This agile approach ensures continuous progress visibility, with a working prototype ready at the end of Week 3.

Sprint	Week	Focus Area	Deliverables	Milestone
Sprint 1	Week 1	Farm Discovery & Configuration	Farm layout, houses, cages/pens, camera workflow, roles, privacy rules and environment setup	Kick-off Complete
Sprint 2	Week 2	Video Pipeline & Chicken Detection	Farm camera/video intake, processing queue, chicken detection and zone mapping	AI Engine Live
Sprint 3	Week 3	Counting, Density & Alerts	Chicken counting, density analytics, inactivity, feed/water and mortality-support alerts	Working Prototype
Sprint 4	Week 4	Dashboard Development	Farm dashboard, house views, count charts, flock activity and farm security alerts	Dashboard Live
Sprint 5	Week 5	Reports, Privacy & Access Control	Batch summaries, evidence clips, count reports, audit trails, no-leakage controls	Full Feature Set
Sprint 6	Week 6	Testing, Launch & Handover	End-to-end QA, performance validation, deployment, documentation, training	Final Delivery

10 | DELIVERABLES & ACCEPTANCE CRITERIA

Deliverable	Format	Acceptance Criteria
Chicken Farm AI Video Analytics Platform	Web Application	Poultry farm analytics modules functional and responsive across devices
Farm Camera & Video Processing Pipeline	Platform Module	Live farm camera feeds and uploaded poultry videos processed securely
Chicken Detection Engine	Integrated AI Service	Birds detected across houses, cages, pens, feeders, drinker zones and open farm areas
Chicken Counting Engine	Integrated AI Service	Flock count estimated by house, pen, cage, camera zone, batch and time period
Flock Density & Activity Analytics	Platform Module	Crowding, clustering, movement, inactivity and feed/water activity tracked
Mortality & Health Signal Support	Platform Module	Possible dead-bird, missing-bird and abnormal behavior alerts generated for review
Poultry Farm Intelligence Dashboard	Dashboard Module	Farm, house, batch, count, density, activity and security dashboards rendered
Reports, Alerts & Evidence Clips	Reports + Exports	Count reports, batch summaries, health-signal clips and farm alerts generated
Admin & Role Management	Web Interface	Configurable farms, houses, cameras, batches, roles, permissions and users
Solution Documentation	Document Package	System overview, deployment guide, and end-user manual
Deployment & Hosting Setup	Live Environment	Secure, accessible URL with monitoring and handover completed

11 | WHY SPRECTEX AI — OUR DIFFERENTIATORS

End-to-End Poultry Video Analytics	We cover the entire poultry video analytics workflow — farm camera intake, chicken detection, counting, density, activity, alerts, dashboards, evidence clips, reports and secure deployment.
Ready-to-Go in 6 Weeks	Our product is ready to deploy. We configure, customize, and launch it for your organization in just six weeks, with a working prototype by Week 3.
Built for Global Poultry Farms	The platform is configurable for broiler farms, layer farms, breeder farms, hatcheries, poultry houses, cages, pens, sheds, barns, free-range zones and multi-site operations worldwide.
Farm-Safe Deployment	We support farm-premises or private-cloud deployment so poultry camera feeds and farm footage stay within the client-approved environment with no leakage.
Enterprise Security & Governance	All farm video, flock, batch and operational data is handled under strict confidentiality, encrypted storage, role-based access, and audit trails. NDAs are signed as standard practice.
Counting & Alerts by Default	Automated count reports, flock activity alerts, mortality-support clips, security notifications and dashboards reduce monitoring time and support faster farm decisions.
Post-Delivery Support	Every engagement includes 30 days of complimentary post-launch support for fixes, refinements, and technical guidance.

12 | TERMS, CONDITIONS & NEXT STEPS

Licensing & Ownership

Upon project completion and handover, the client receives full rights to use the deployed Chicken Farm Video Analytics System and all configuration specific to this engagement. Sprecetex AI retains rights to its core proprietary frameworks and pre-trained base models.

Confidentiality & Data Protection

Sprecetex AI treats all farm video, camera, flock, batch, production and organizational data with strict confidentiality. An NDA is signed prior to commencement. All team members are bound by confidentiality agreements. No client data is shared, sold, or used for purposes outside this engagement, in line with applicable data-protection regulations.

Change Management

Any changes to scope after Sprint 2 are subject to a formal change request process. Minor changes (under 4 hours effort) are accommodated within the agreed scope. Larger scope additions are agreed separately and require mutual written agreement.

Warranty & Bug Fixing

All delivered features are covered by a 30-day warranty period post-launch. Critical bugs are resolved within 48 hours. Non-critical issues are addressed within 5 business days at no additional charge.

Force Majeure

Neither party shall be liable for delays caused by events beyond reasonable control, including natural disasters, network outages, or government-mandated restrictions. Project timelines will be adjusted mutually in such events.

Governing Terms

This proposal constitutes a commercial offer. A formal contract/Statement of Work will be issued upon acceptance. Disputes are subject to good-faith mediation before any formal legal proceedings.

NEXT STEPS TO PROCEED

- **Step 1:** Review this proposal and confirm agreement on scope
- **Step 2:** Sign the Statement of Work (SOW) and Non-Disclosure Agreement (NDA)
- **Step 3:** Share sample poultry footage, farm layout, camera locations, houses/batches and dashboard requirements for configuration
- **Step 4:** Project kick-off meeting scheduled within 48 hours of confirmation
- **Step 5:** Weekly check-in meetings throughout the 6-week delivery
- **Step 6:** Go live with your ready-to-go Chicken Farm Video Analytics Platform

READY TO BEGIN?

Contact us today to confirm your acceptance and launch your Chicken Farm Video Analytics Platform.
